6 November 2011

Dear Lorraine,

Dislocation to the clean water supply to residents at Dale Farm, in particular to children and the sick, and including those with caravans on plots not subject to lawful enforcement notices, is one of the issues we shall be raising in due course at the Court of Human Rights.

We understood you have been advising the residents that they should boil their drinking water. This is a totally inadequate response. We urge that until the piped water, broken and contaminated by the careless action of your agents and contractors, is restored a supply of bottled drinking water be delivered to all those in need.

You must be aware that access to clean drinking water is one of the primary services required by any community and a fundamental right.

Water supply is covered by the Court Order, and needs to be addressed in priority to other works being done along.

Please notify our members through the above address (since normal postal services are being discontinued) that a) bottled water is available, b) reliable piped water has been restored in conjunction with Essex Water.

Sincerely

Grattan Puxon

CC Keith Lomax, solicitor
